

\$PIECE WHITEPAPER

A unique memecoin on the TON Chain

INTRODUCTION

Welcome to one of the most unconventional yet honest projects in cryptocurrency history: \$PIECE!

In a world, where cryptocurrencies and especially memecoins often take themselves far too seriously, pretend to have utility and are constantly talking about dogs, we take a different approach. ONE is a token that takes the concept of community and generosity to the extreme. \$PIECE is not just the currency, it is a lifestyle, a statement and a fun ride through the turbulent space of blockchain technology. We are not interested in marketing campaigns that cause a pump and dump. We are not interested in HODLers who only want to be part of the community because an influencer promises them that they can make quick money here. We want to build a community that likes the concept and believes in success together. This may slow down the growth, but it makes it organic and honest.

The ticker: \$PIECE

Why \$PIECE? Because we believe everyone deserves a piece of the pie. And not just one piece – a piece from the ONE. "ONE" symbolizes unity, the whole, and everyone who holds \$PIECE is part of this unity. It is a metaphor for sharing and community.

The concept

The concept behind \$PIECE is as simple as it is ingenious: There is only one token. You share this token with the community. That's all. No complicated smart contracts, no tokenomics requiring a degree in quantum physics. Just a token you share.

\$PIECE runs on the TON Chain, one of the most innovative and powerful blockchains out there. The TON Chain is closely interwoven with Telegram. With 950 million daily Telegram users, it is obvious that the success of the TON Chain is yet to come.

But what makes \$PIECE so special?

One coin, many pieces: There is only one ONE coin, but it is divided into countless pieces. Each holder of a \$PIECE therefore owns a part of the larger whole.

Sharing is the new Holding: The highlight of \$PIECE is that the community is encouraged to share ONE. The more you share, the more you get in return – in the form of social standing, fun, and maybe even real-world benefits.

The mascot: A firefly

Why a firefly, you ask? Because fireflies glow in the dark, just like \$PIECE in the murky world of cryptocurrencies. They are small, never travel alone, inconspicuous, but when you see it, you will never forget it. Our firefly is the shining star in the Memecoin galaxy. Plus, fireflies are cool.

TECHNICAL DETAILS

Blockchain:

TON Chain – fast, scalable and secure.

Token Standard:

\$PIECE uses the TON Chain token standard, which allows tokens to be divided into tiny parts.

Supply:

There is only one *ONE*, but infinitely many pieces of it. Think of it like a pizza that can be shared again and again without running out of stock.

Because our supply is *ONE* token, we use 18 decimals.

This way we get the same resolution as a token that has 1B supply and 9 decimals.

Locks (Starting phase):

- 50% of Supply is Locked for 6 months
- 25% of Supply is Locked for 3 months

- 90% of liquidity is locked for 6 months
- 9% of liquidity is locked for 3 months

Supply will get locked according to demand

Liquidity will eventually get burned.

THE MISSION OF \$PIECE

\$PIECE wants to lighten up the cryptocurrency community and show that blockchain technology is not just for serious applications.

We want to:

- Have fun: Cryptocurrencies are often too serious. *\$PIECE* brings back the laughter.
- Promote community: Sharing pieces strengthens the community.

ROADMAP

Phase 1:

Free Pavel Durov from custody

Our first goal is to free Pavel Durov from prison. With our dedicated devs working day and night, we will put this plan into action.

Phase 2:

Mastering the Tonchain

Now that we've freed Pavel, it's time to master the Tonchain. With *\$PIECE* in hand (or rather, on the blockchain), we will revolutionize the Tonchain. How? We don't know exactly yet, but we're working on it.

Phase 3:

World Domination

And then, my friends, it's about world domination. With *\$PIECE* as our standard, we will change the world. Perhaps.

CONCLUSION

\$PIECE is more than just a memecoin; it is a movement, a philosophy, a lifestyle. It doesn't take itself seriously, and that's what makes it so special. No utility, no bells and whistles – just pure, unadulterated meme fun.

AND ABOVE ALL: HAVE FUN!

Note: This white paper is intended to be humorous and reflects the absurdity and creativity of modern cryptocurrency culture. Investing in cryptocurrencies carries risks, and *\$PIECE* should not be viewed as financial wisdom, but as a fun project that pushes the boundaries of blockchain technology.
